PROFESSIONAL SUMMARY

DevOps Engineer with 3.5+ years of experience in cloud infrastructure, AWS security, MLOps, GitOps, and Agentic AI solutions using Amazon Q. Expert in AWS EKS/ECS, containerization, CI/CD pipelines, IAM management, and building scalable infrastructure. Proven track record in distributed systems, VPC networking, and automated infrastructure deployment with comprehensive security implementation.

TECHNICAL SKILLS

Cloud Platforms: Amazon Web Services AWS, Google Cloud Platform GCP, Microsoft Azure, DigitalOcean
Containers Orchestration: Docker containerd, Kubernetes K8s, Amazon EKS, Amazon ECS Fargate
CI CD GitOps: GitLab CI, AWS CodePipeline, GitHub Actions, ArgoCD, Jenkins
Infrastructure as Code IaC: Terraform, AWS CloudFormation, Helm Charts, Ansible
AWS Security: IAM Identity Access Management, VPC Virtual Private Cloud, Security Groups, NACLs, AWS WAF, AWS Shield
Monitoring Observability: Grafana, Kibana, Amazon CloudWatch, Prometheus
Databases: MongoDB, MySQL, PostgreSQL, Amazon RDS, Amazon Aurora
Agentic AI MLOps: Amazon Q, MCP Servers, MLOps Pipelines, Machine Learning Operations

PROFESSIONAL EXPERIENCE

DevOps Engineer

Webkul Software Pvt. Ltd.

Noida, Uttar Pradesh | December 2022 - May 2026

- Deployed and managed cloud services on AWS including EC2, RDS, S3, CloudFront, ECS, and EKS with comprehensive security implementation
- Implemented IAM roles, policies, VPC configuration, Security Groups, NACLs, WAF, and Shield for production workloads
- Built Kubernetes deployments for Node.js/MongoDB applications on EKS clusters using ALB ingress controllers
- Designed Java Maven applications with Aurora Database on EKS with cross-account access and role-based security
- Built CI/CD pipelines using GitHub Actions, AWS CodePipeline, CodeBuild, and CodeDeploy for production applications
- Deployed Laravel eCommerce on ECS Fargate with Terraform infrastructure, ECR integration, and Blue-Green deployments
- Conducted cost optimization, infrastructure modifications, and security compliance auditing
- Provided client solutions by designing tailored cloud architectures and troubleshooting complex issues

Trainee Cloud Engineer

CEDCOSS Technologies Private Limited

Lucknow, Uttar Pradesh | April 2022 - November 2022

- Managed, coordinated, and implemented software upgrades, patches, and hot fixes on servers, workstations, and network hardware
- Designed and optimized bash and python scripts for efficient task automation

KEY PROJECTS

AWS Cloud Security Implementation | IAM, VPC, WAF, Shield

2024 - Present

- Implemented comprehensive security architecture with IAM roles, policies, and cross-account access for multi-environment deployments
- Configured VPC with Security Groups, NACLs, and subnet isolation for production workloads
- Deployed WAF on ALB and CloudFront for protection against SQL injection, XSS, and DDoS attacks
- Established CloudTrail logging and CloudWatch monitoring for security event tracking and incident response

Multi-Account Security Architecture | Organizations, Control Tower

2023 - 2024

- Designed multi-account architecture using AWS Organizations and Control Tower for centralized governance
- Created cross-account IAM roles for secure resource access between Dev, Staging, and Production environments
- Implemented Service Control Policies and Permission Boundaries for fine-grained access control
- Configured GuardDuty and Security Hub for threat detection and centralized security findings management

Distributed Agent System | Python, AWS, Terraform

January 2026

- Built distributed system with secure agent communication, automated deployment, and real-time knowledge sharing across 10+ regions
- Implemented SSL/TLS encryption, API authentication, and network isolation for production-ready security
- Automated AWS infrastructure deployment using Terraform with VPC, Security Groups, and EC2 instances across multiple regions
- Achieved fault-tolerant architecture with local caching, automatic failover, and centralized logging with systemd services

[GitHub: distributed-agent-system](#)

MLOps & GitOps Infrastructure with Amazon Q Integration

- Managed AWS EKS clusters with Amazon Q integration for MLOps and GitOps operations
- Configured Kubernetes with DevOps tools using MCP servers for secure, highly available infrastructure
- Implemented GitOps management using GitHub Actions and ArgoCD with Helm charts

Full-Stack Application with AWS ECS & Amplify

- Deployed React frontend and Node.js backend on AWS ECS clusters
- Implemented AWS Amplify with Cognito authentication, authorization, and face recognition
- Built Lambda handlers for user verification with Terraform infrastructure provisioning
- Implemented CI/CD with Blue-Green deployment and DockerHub integration

Repositories: [Application Code](#) | [Infrastructure Code](#)

Multi-Tenant Kubernetes SaaS Platform | Kubernetes, Terraform, Proxmox

- Deployed scalable Kubernetes cluster on on-premises infrastructure with Proxmox hypervisor
- Built multi-tenant Odoo SaaS with Kubernetes orchestration for client isolation and resource management
- Implemented JFrog Artifactory and Vault CSI for secure container image repository and secret management
- Automated VM provisioning using Terraform with Proxmox provider for dynamic cluster scaling

Additional Projects

- **WordPress on ECS Fargate:** Container orchestration with CI/CD using CodeBuild, CodeDeploy, and Blue-Green deployments
- **Monitoring Dashboard:** Phalcon Application on ECS Fargate with Grafana & Prometheus integration
- **Code Quality Automation:** Jenkins-SonarQube integration for automated quality checks and merge approvals
- **Infrastructure Automation:** Boto3 Python SDK for ALB management, AMI creation, and zero-downtime updates
- **GCP Deployment:** Terraform-based VM deployment with Load Balancer integration and workspace management
- **High-Availability PostgreSQL:** Bare metal setup with pgpool2 and repmgr for fault tolerance

EDUCATION

Master of Computer Applications

IISE Group of Institutions

Lucknow, Uttar Pradesh | Graduated August 2022

Bachelor of Computer Applications

School of Management Sciences

Lucknow, Uttar Pradesh | Graduated August 2019

CERTIFICATIONS

- Certified AWS Cloud Practitioner
- Oracle Certified Foundation Associate
